Villa Windows are a rare combination of style, substance, sealing and security.

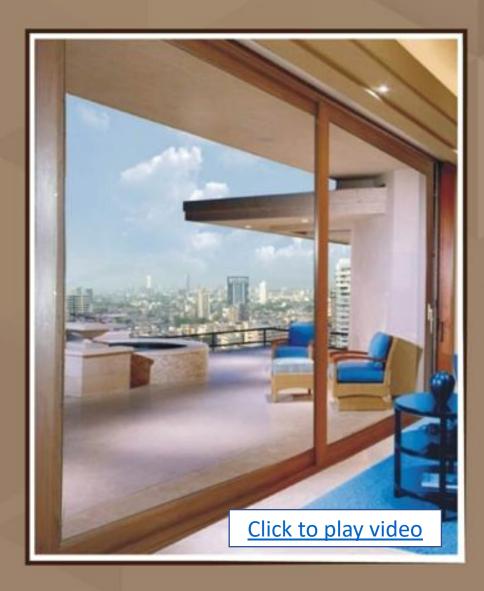

The only uPVC casement in the world with a twin sash, a bug mesh and a grill built into the system

Ensures protection from mosquitoes, other insects and theft without sacrificing on ventilation

Heat and Noise insulation due to dual seal and multi-chambered designs

Provides insulation from rain, dust and pollution

Lift & Slide Doors are a much sought-after choice for covering large spans that connects inside with outside.

Lift & Slide
Technology - Glides
back and forth on
feather touch rollers,
with very little
effort...

Provides vast panoramic views through its expansive glass panes that come without any dividers

Ensures hurdle free connection to the outside due to its extremely low doorsill

Guarantees bigger openings, superior insulation & enhanced security

Slide & Fold Doors, designed for large openings, joins multiple sashes in a unique slide and fold mechanism.

New-generation door, designed for large/ unobstructed openings

Can divide and join spaces effortlessly of any home

Contemporary. Stylish. Aesthetically exceptional Fusion welded frame and sash for strength and superior durability

Low Threshold Slider, comes with all the advantages of slider doors with a lower threshold thus seamlessly connects the home's indoor to outdoor.

Reduces chances of slips, trips and falls Threshold height of only 25mm

Seamlessly connects the indoor and outdoor of a home

Comes with multiple submerge options

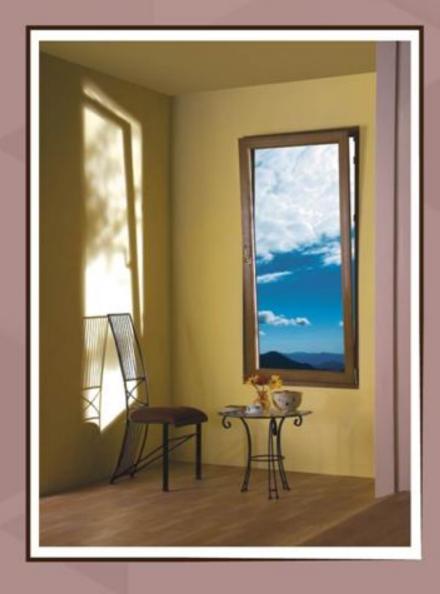

Corner Slider - Keeping in mind the styles of contemporary homes, Fenesta introduced the Corner Slider system.

Eliminates corner post and significantly expands access to outdoor area Perfect for use in corners of balcony, garden spaces and façades

Does not obstruct the outdoor view while closed Comes with integrated bug screen & efficient sealing

Tilt and Turn Windows features a sash that can tilt open at an angle from the top with hinges at the bottom or swing inwards with hinges on the side. Advanced engineering facilitates both these operations with simple turn of a single handle.

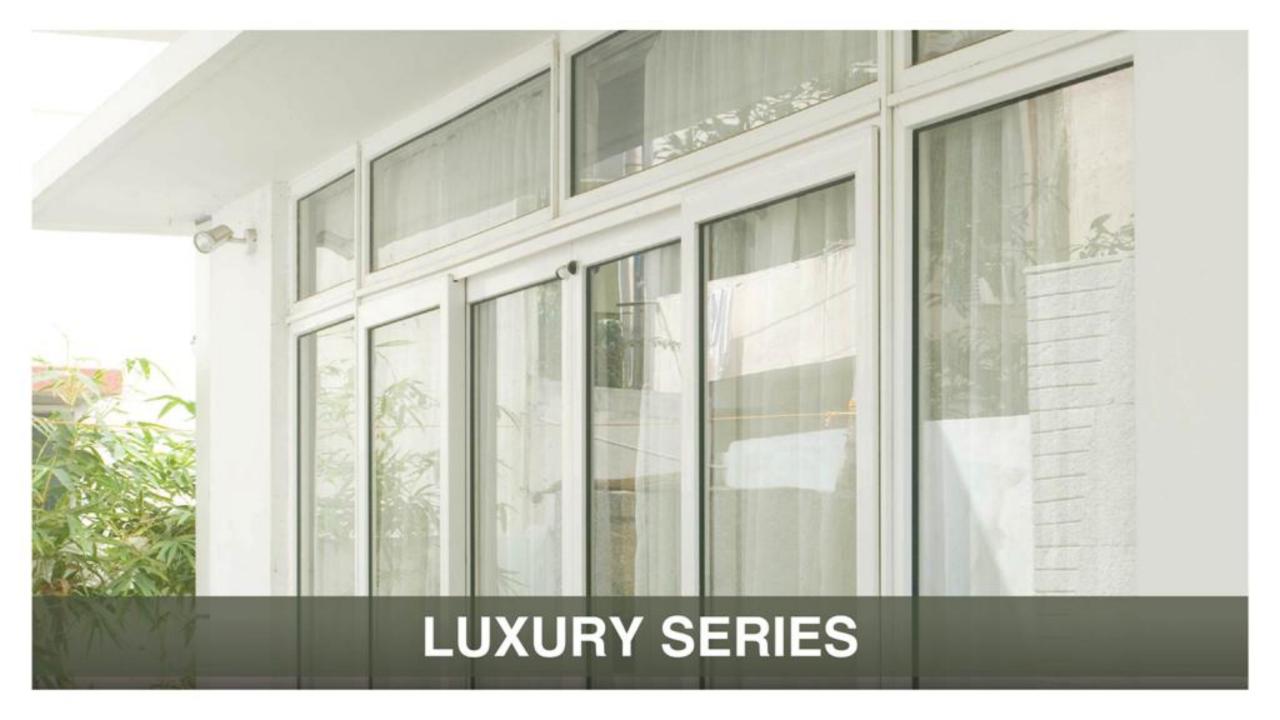

> Tilt position allows draft-free ventilation and rain protection

Turn position opens like a inside opening casement window offering full ventilation and easy cleaning

Brings maximum sunlight, insulation and aesthetics

Weather resistant; Not prone to rust, termite, corrosion or fading

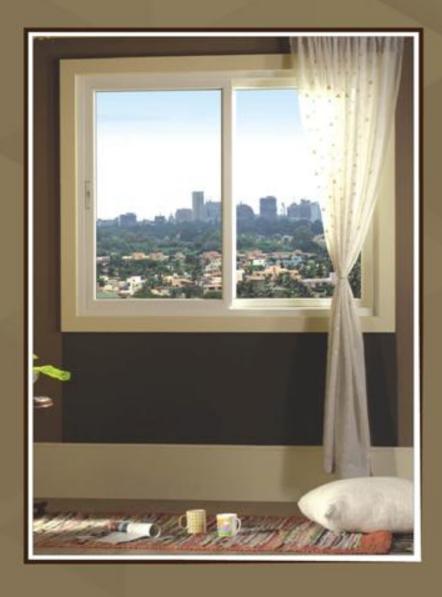

Casement Windows features a sash that is hinged from the side on an outer frame and can open inwards or outwards, to the left or the right, allowing maximum flow of air into the room.

> Ensures superior sound insulation and high energy efficiency

Enables better thermal and sound insulation due to double/triple glazing options

Resists rusting and corrosion due to its high quality hardware Provides enhanced security through multi-point locking

Sliding Windows features two (or more) horizontal sashes fitted with rollers at the bottom for swift sideways movement on tracks.

Optimises space usage as the sashes slide and do not open inwards

Improves ventilation as sashes can be moved left or right

Ensures smooth sliding/easy motion due to low friction between rollers and track

Covers larger spans through multi-track and sash options

Combination Windows is an integration of sliding, casement and fixed window or two windows of the same type or different types (casement-slider or fixed-slider).

Ensures greater freedom with shape, style or size

Maximizes natural lighting and energy efficiency

Protects against insects through its integrated bug mesh Flexibility in design options for covering large openings

Glass-to-Glass Window features a fixed window unit, where the glass panes meet at an angle of 90° and are neatly joined together without using any mullions.

Ensures large panoramic view without any hindrance from corner posts or joints

Allows maximum sunlight throughout the day

Creates a sense of space and openness by replacing part of a wall in a room

Adds elegance to the home by becoming a design focal point

Fixed Windows popularly known as picture windows are stationary, non-opening windows intended to allow light into the room. They offer an unobstructed view of outside and enhance the aesthetics of a home.

Saves cost, time and efforts as compared to movable windows

Allows maximum sunlight and is extremely energy efficient

Offers superior sound insulation

Protects against rain water seepage and high-speed winds

Switch Glass - It is a unique glass that works on the principle called Piezoelectric effect.

When power is off - Liquid crystals are randomly scattered, resulting in opaque state of glass.

When power is on - When electricity passes through, liquid crystals align, resulting in clear state of glass.

Ensures freedom from the headache of maintaining curtains, shades or blinds Helps save money.
Protects furniture
from ultraviolet light.
Doubles up as a
projection screen

Functions through a simple remote control

Georgian Bar - Applying the science of today, Fenesta has revived window art that dates back to the 18th century: the Georgian era. In a single piece of glazing, Fenesta fastens astragal bars, creating the appearance of a classic casement window with multiple panes.

Reproduces the stunning effect of a traditional Georgian or Victorian window Improves the aesthetics of the building. Brings nature closer

Uses clip system unlike the traditional double tape

Trims – an assortment of decorative frames designed to enhance the aesthetic value of any door or window. Trims can influence the style of home interiors by adding a distinctive dimension.

> Adds a decorative frame to your doors and windows

Makes doors and windows stand out as architectural focal points, rather than giving an unfinished look

BUG SCREENS

Slide for a beautiful view, fresh air and protection from insects and flies. Sliding bug screen solution can be fitted on the already installed slider windows and doors.

Pull Down Bug Screen

Just pull it down to keep flies, insects and mosquitoes out. It is best suited for casement outward opening windows.

Pleated Bug Screen

Recreates the effect of blinds with pleated bug screen, Simply slide it across to keep mosquitoes out as you let fresh air in.
